The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haber 4103773.

Haber teaches a hopper 22 and a tray 14 and further having a truncated level 18. Elements 31 on the hopper are configured to complement elements 30 on the base. An effective hinge arrangement results. Elements 17 and 21 are "dimples" with a "curvature". The sidewalls of hopper 22 and tray 14 and truncated level are the "spacer" elements. The "lid" is shown at 24.

The particular configuration allows for easy stacking. To use the design of Haber to stack golf balls rather than pool balls would have been obvious for one having ordinary skill in the art at the time of the invention. No unobvious or unexpected results ensue.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar devices are cited on the attached PTO 892.
